ACKNOWLEDGEMENTS

The PQS Development Group gratefully acknowledges the assistance of the following personnel in writing this PQS:

DCCM (SW/AW)  Mark WEATHERS  SWOS Learning Site, Fort Leonardwood
DCCM (SW/AW)  Terry WYLIE  SWOS Learning Site, Norfolk
DCCS ((SW)  Erich BUHLER  SWOS, N74
DCCS (SW)  Randall SPENNY  ATG, San Diego
DCCS (SW/AW)  Brian WILCOX  CNSP
DCC(SW)  Roger NAYLOR  ATG, Norfolk
DCC(SW/AW)  Steve ROBERTS  CNAF
Mr.  Ron ORASON  CNSP
Mr.  Ron ROLLER  NSWC, Dahlgren Division

Surface Warfare Officer School personnel who provided direct support for this PQS:

Mrs.  Delphine JACKSON  Program Manager
MMC (SW/AW)  Mark GOLEY  Workshop Facilitator

The Model Manager for this PQS:

Surface Warfare Officer School (SWOS)  DSN 564-5332
INTRODUCTION

PQS PROGRAM

This PQS program is a qualification system for officers and enlisted personnel where certification of a minimum level of competency is required prior to qualifying to perform specific duties. A PQS is a compilation of the minimum knowledge and skills that an individual must demonstrate in order to qualify to stand watches or perform other specific routine duties necessary for the safety, security or proper operation of a ship, aircraft or support system. The objective of PQS is to standardize and facilitate these qualifications.

CANCELLATION

This Standard cancels and supersedes NAVEDTRA 43119-4G.

APPLICABILITY

This PQS is applicable to all naval ships.

MODEL MANAGER

The Model Manager Command manages a specific PQS manual. This includes overseeing the process of monitoring and updating assigned PQS manuals from the standpoint of technical content and relevance within the community.

TAILORING

To command tailor this package, first have it reviewed by one or more of your most qualified individuals. Delete any portions covering systems and equipment not installed on your ship, aircraft or unit. Next, add any line items, fundamentals, systems and watchstations/workstations that are unique to your command but not already covered in this package. Finally, the package should be reviewed by the cognizant department head and required changes approved by the Commanding Officer or his designated representative. Retain the approved master copy on file for use in tailoring individual packages.
INTRODUCTION (CONT'D)

QUALIFIER

The PQS Qualifier is designated in writing by the Commanding Officer to sign off individual watchstations. Qualifiers will normally be E-5 or above and, as a minimum, must have completed the PQS they are authorized to sign off. The names of designated Qualifiers should be made known to all members of the unit or department. The means of maintaining this listing is at the discretion of individual commands. For more information on the duties and responsibilities of PQS Qualifiers, see the PQS Unit Coordinator’s Guide.

CONTENTS

PQS is divided into three sections. The 100 Section (Fundamentals) contains the fundamental knowledge from technical manuals and other texts necessary to satisfactorily understand the watchstation/workstation duties. The 200 Section (Systems) is designed to acquaint you with the systems you will be required to operate at your watchstation/workstation. The 300 Section (Watchstations) lists the tasks you will be required to satisfactorily perform in order to achieve final PQS qualification for a particular watchstation/workstation. All three sections may not apply to this PQS, but where applicable, detailed explanations are provided at the front of each section.

REFERENCES

The references used during the writing of this PQS package were the latest available to the workshop, however, the most current references available should be used when qualifying with this Standard.

NOTES

Classified references may be used in the development of PQS. If such references are used, do not make notes in this book as answers to questions in this Standard may be classified.

TRAINEE

Your supervisor will tell you which watchstations/workstations you are to complete and in what order. Before getting started, turn to the 300 Section first and find your watchstation/workstation. This will tell you what you should do before starting your watchstation/workstation tasks. You may be required to complete another PQS, a school, or other watchstations/workstations within this package. It will also tell you which fundamentals and/or systems from this package you must complete prior to qualification at your watchstation/workstation. If you have any questions or are unable to locate references, contact your supervisor or qualifier. Good luck!
INTRODUCTION (CONT’D)

**PQS FEEDBACK REPORTS**

This PQS was developed using information available at the time of writing. When equipment and requirements change, the PQS needs to be revised. The only way the PQS Development Group knows of these changes is by you, the user, telling us either in a letter or via the Feedback Report contained in the back of this book. You can tell us of new systems and requirements, or of errors you find.
SUMMARY OF CHANGES

WATCHSTATION REQUALIFICATIONS

Due to changes in policies, systems, or procedures, personnel dealing with the subject matter of this PQS may be required to requalify IAW NAVEDTRA 43100-1G, Ch. 5, PQS Unit Coordinator’s Guide.

The following watchstations regardless of qualifications achieved in previous versions, shall be completed.

None.
ACRONYMS USED IN THIS PQS

Not all acronyms or abbreviations used in this PQS are defined here. The Subject Matter Experts from the Fleet who wrote this Standard determined the following acronyms or abbreviations may not be commonly known throughout their community and should be defined to avoid confusion. If there is a question concerning an acronym or abbreviation not spelled out on this page nor anywhere else in the Standard, use the references listed on the line item containing the acronym or abbreviation in question.

INTRODUCTION TO FUNDAMENTALS

100.1 INTRODUCTION
This PQS begins with a Fundamentals section covering the basic knowledge and principles needed to understand the equipment or duties to be studied. Normally, you would have acquired the knowledge required in the Fundamentals section during the school phase of your training. If you have not been to school or if you need a refresher, the references listed at the beginning of each fundamental will aid you in a self-study program. All references cited for study are selected according to their credibility and availability.

100.2 HOW TO COMPLETE
The fundamentals you will have to complete are listed in the watchstation (300 section) for each watchstation. You should complete all required fundamentals before starting the systems and watchstation portions of this PQS, since knowledge gained from fundamentals will aid you in understanding the systems and your watchstation tasks. When you feel you have a complete understanding of one fundamental or more, contact your Qualifier. If you are attempting initial qualification, your Qualifier will expect you to satisfactorily answer all line items in the fundamentals. If you are requalifying or have completed the appropriate schools, your Qualifier may require you to answer representative line items to determine if you have retained the necessary knowledge for your watchstation. If your command requires an oral board or written examination for final qualification, you may be asked any questions from the fundamentals required for your watchstation.
101.1 Discuss the concept of ORM. [ref. a]

(Signature and Date)

.2 Explain the following as they apply to ORM: [ref. a]

a. Identifying hazards  
b. Assessing hazards  
c. Making risk decisions  
d. Implementing controls  
e. Supervising

(Signature and Date)

.3 Explain the use of each of the following:

a. Lagging [ref. b, app. l]
101.3 Flange spray shields [ref. c, sec. 7]
   Incandescent light steam-tight cover (explosion proof) [ref. h, sec. 2]

(Signature and Date)

.4 State the safety precautions to be followed when working with rotating machinery.
   [ref. d, ch. C13]

(Signature and Date)

.5 State the safety precautions to be followed when operating a compressed air
   system. [ref. e, sec. 1]

(Signature and Date)

.6 State the hazard of oil in the bilges. [ref. f, sec. 6; ref. j, sec. 2]

(Signature and Date)

.7 State the safety precautions applicable for the use, handling, and storage of
   hydraulic fluids and synthetic lubricants aboard your ship. [ref. k, sec. 1]

(Signature and Date)

.8 Explain the oily waste discharge limitations as they apply to shipboard personnel.
   [ref. m, ch. 19]

(Signature and Date)

.9 State the procedures required in the event of an oil spill. [ref. m, ch. 19]

(Signature and Date)

.10 State the protection provided by the following safety equipment; include examples of
    ship evolutions that require their use:

   a. Long-sleeved shirt [ref. d, ch. C13]
   b. Hard hat [ref. d, ch. B12]
   c. Goggles/safety glasses/face shield [ref. d, ch. B5]
   d. Gloves [ref. d, ch. B12]
   e. Safety shoes [ref. d, ch. B12]
h. Safety harness/DYNA-brake [ref. l, ch. B12]
i. Life jacket [ref. d, ch. B12]
j. Rubber mats [ref. g, sec. 3]
k. Rubber aprons [ref. d, ch. C23]
l. Hearing protection [ref. d, ch. B5]

(Signature and Date)

101.11 State the safety precautions to be followed prior to and when entering a void or poorly ventilated space. [ref. l, sec. 18]

(Signature and Date)

101.12 State the safety precautions to be followed when using the following:

a. Calcium hypochlorite [ref. d, ch. C23]
b. Solvents [ref. d, ch. C23]
c. Caustic soda [ref. d, ch. C23]
d. Refrigerants [ref. n, sec. 1]

(Signature and Date)

101.13 State the safety precautions to be observed and personnel safety equipment/devices required in the following situations:

a. Replenishment-at-sea evolutions [ref. d, ch. C3]
b. Working aloft [ref. d, ch. C8]
c. Heavy weather [ref. d, ch. C16]
d. Working with paint [ref. d, ch. C18]
e. Working with electrical/electronic equipment [ref. d, ch. C9]
f. Operating portable electric tools [ref. d, chs. C9, C13]
g. Welding, cutting, and brazing [ref. d, ch. C11]
h. Working with workshop equipment [ref. d, ch. C13]
i. Handling hazardous material [ref. d, ch. C23]
j. Working with synthetic LO [ref. j, sec. 4]
k. Working with pneumatic tools [ref. d, ch. C13]

(Signature and Date)
101 SAFETY PRECAUTIONS FUNDAMENTALS (CONT’D)

101.14 State the importance of tag-out procedures and clearing of tags. [ref. d, ch. C9]

________________________________________________________________________
(Signature and Date)

.15 State the safety precautions when working close to electrical circuits. [ref. d, ch. 9]

________________________________________________________________________
(Signature and Date)

.16 State the procedures for removing a victim from an energized circuit. [ref. d, ch. 9]

________________________________________________________________________
(Signature and Date)

.17 Explain the possible damage caused by missile hazards and flammable materials as applied to safety. [ref. d, ch. C1]

________________________________________________________________________
(Signature and Date)

.18 Discuss the safety precautions to follow when working around pressurized systems. [ref. c, sec. 8]

________________________________________________________________________
(Signature and Date)

.19 State the procedures for working on a system that opens to the sea. [ref. c, sec. 1]

________________________________________________________________________
(Signature and Date)

.20 Discuss the procedures required to permit underwater work by divers. [ref. d, ch. C8; ref. o]

________________________________________________________________________
(Signature and Date)

.21 Discuss the procedures required aboard your ship to gain permission to go aloft. [ref. d, ch. C8; ref. o]

________________________________________________________________________
(Signature and Date)
101.22 State who grants permission to start/test major machinery in-port. [ref. o]

(Signature and Date)

.23 Discuss the purpose and location of the CHT/MSD spill kit(s). [refs. o, p]

(Signature and Date)

.24 Discuss the procedures and actions taken for a CHT/MSD spill. [refs. o, p, i]

(Signature and Date)

.25 Discuss the hazards associated with the following: [ref. d]

a. AFFF
b. HFP/Halon
c. CO₂

(Signature and Date)

h. SDOSS [ref. a, ch. 4]
i. BOSS [ref. a, ch. 4]
j. Restrictive Maneuvering Doctrine [ref. g]

(Signature and Date)

.2 Discuss the duties of the following as defined in your ship's EDORM and SORM:

a. Engineer Officer [ref. e, ch. 2]
b. Main Propulsion Assistant [ref. e, ch. 2]
c. Damage Control Assistant [ref. e, ch. 2]
d. Electrical Officer [ref. e, ch. 2]
e. Engineering Administrative Assistant [ref. e, ch. 2]
f. Oil King [ref. e, ch. 2]
g. EDO [ref. e, ch. 2]
102 ENGINEERING FUNDAMENTALS (CONT’D)

102.2 h. EOOW [ref. e, ch. 2]
i. Fire Marshall [ref. c, ch. 2]
j. Gas Free Engineering Personnel [ref. d, sec. 18]
k. DCC Supervisor [ref. e, ch. 2]
l. Sound and Security [ref. e, ch. 2]

(Signature and Date)

.3 State the purpose of the following logs/reports/orders:

a. Engineering Log [ref. a, ch. 2]
b. Fuel and Water Report [ref. a, ch. 2]
c. Engineering Officer Night orders [ref. a, ch. 2]
d. DC Closure Log [ref. c, ch. 3]
e. Engineering Standing orders [ref. g]
f. Trouble Call Record [ref. g]
g. NAVSEA TMDER/NAVSEA Form 9086/10 [ref. k]
h. Daily Draft Report [ref. f]
i. Gas Free Engineering Log [ref. a, ch. 2]
j. SCBA Electric Compressor Operator Log [ref. a, ch. 2]

(Signature and Date)

.4 Discuss the following terms as they relate to calculating a draft:

a. Displacement [ref. h, sec. 3]
b. List [ref. h, sec. 3]
c. Trim [ref. h, sec. 3]
d. Drafts [ref. h, sec. 3]
   1. Navigational
   2. Calculative
   3. Mean
   4. Limiting
e. Clinometer [ref. i, ch. 3]

(Signature and Date)

.5 Discuss the purposes of and situation requirements for taking the draft. [ref. i, ch. 3]

(Signature and Date)
102.6 Discuss the operation and functions of the following remote valve operating systems: [ref. j]

a. Mechanical  
b. Electrical  
c. Hydraulic  
d. Pneumatic

(Signature and Date)
103  MECHANICAL FUNDAMENTALS

References:

[a]  Ship's Information Book (SIB)
[b]  Ship's Damage Control Book

[d]  NSTM S9086-RK-STM-010/CH-505R4, Piping Systems
[e]  NAVEDTRA 10572, Damage Controlman 3 & 2

103.1  State the purpose or function of the following items/terms associated with tanks: [refs. a, b]

a.  Overflow
b.  Vent
c.  Sounding tube
d.  Radar tank level sensing devices
e.  TLI

(Signature and Date)

.2  Explain the function of the following:

a.  Flange shields [ref. c, ch. 9]
b.  Pipe hangers and supports [ref. c, ch. 9]
c.  Sounding tape [ref. e, ch. 3]
d.  Reach rod [ref. c, ch. 9]

(Signature and Date)

.3  State the color code for the following systems: [ref. d, sec. 7]

a.  Feedwater/condensate
b.  Firemain
c.  AFFF/water solution
d.  AFFF concentrate
e.  FO
f.  HP air
g.  LP air
h.  Hydraulic
i.  JP-5
j.  LO
103. MECHANICAL FUNDAMENTALS (CONT’D)

103.  
k. Potable water  
l. Seawater  
m. CHT/MSD  
n. Steam  
o. Refrigerants  
p. Chill water  

(Signature and Date)
104 STABILITY FUNDAMENTALS

References:

[a] NSTM S9086-CN-STM-010/CH-079V1R1, Damage Control Stability and Buoyancy
[b] NTTP 3.20.31 (Rev. A), Surface Ship’s Survivability

104.1 Discuss the following terms as they relate to ship's stability: [ref. a]

a. Heel [sec. 11]
b. Freeboard/reserve buoyancy [sec. 3]
c. Free surface effect [sec. 10]
d. Free communication effect [sec. 10]
e. Solid flooding [sec. 10]

(Signature and Date)

.2 Discuss the effects on stability of: [ref. a, secs. 6, 8; ref. b, fig. 5-3]

a. Weight additions above and below the center of gravity
b. Weight removals above and below the center of gravity
c. Weight shifts above, below, to port, and to starboard of the center of gravity

(Signature and Date)

.3 Discuss the various methods used for correcting excessive list and trim caused by flooded compartments. [ref. a, sec. 17]

(Signature and Date)

.4 Explain the use of the flooding effects diagram. [ref. a, sec. 13]

(Signature and Date)

.5 Explain the use of the liquid loading diagram. [ref. a, sec. 14]

(Signature and Date)

.6 Explain the use of FCCS. [ref. a, secs, 10, 13]

(Signature and Date)
References:

[b] Engineering Department Organization and Regulations Manual (EDORM)
[c] NSTM S9086-SE-STM-010/CH-533R3, Potable Water Systems
[d] Local Instructions

105.1 State the purpose of the Physical Security Program. [ref. a, ch. 6]

(Signature and Date)

.2 State how often designated spaces are inspected. [ref. b, ch. 4; ref. d]

(Signature and Date)

.3 State which designated spaces are locked during in-port/underway. [ref. b, ch. 4; ref. d]

(Signature and Date)

.4 State to whom you report violations of physical security. [ref. a, ch. 6; ref. d]

(Signature and Date)

.5 State the requirements aboard your ship for locking devices and seals on the following:

a. AFFF system valves [ref. d]
b. Ballast and deballast valves [ref. d]
c. Feedwater sounding tubes [ref. d]
d. F/O transfer valves [ref. d]
e. L/O transfer valves [ref. d]
f. Potable water sounding tubes [ref. c, sec. 2]
g. CHT system vent valves [ref. b, ch. 4]

(Signature and Date)
105.6 Explain the procedures for reporting the following:

a. Bomb threat [ref. d]
b. Intruder [ref. d]
c. Sabotage [ref. a, ch. 5]

(Signature and Date)
INTRODUCTION TO SYSTEMS

200.1 BASIC BUILDING BLOCKS

In this section, the equipment is broken down into smaller, more comprehensible, functional systems as basic building blocks in the learning process. Each system is written to reflect specific watchstation requirements by identifying the equipment most relevant to one or more designated watchstanders. The less complex systems may be identified and covered quickly or relegated to a lower priority to permit greater emphasis on more significant or complex systems.

200.2 COMPONENTS AND COMPONENT PARTS

For learning purposes each system is disassembled into two levels. Systems have components and components have parts. Do not expect to see every item which appears on a parts list to be in the PQS. Only those items which must be understood for operation/maintenance are listed. Normally a number of very broad (overview) systems are disassembled into their components or parts with the big picture as the learning goal. Items listed as components in such a system may then be analyzed as separate systems and broken down into components and parts. Example: the turbogenerators may be listed as a component of the Ship’s Service Electrical Distribution system and then later detailed as an individual system for closer study.

200.3 FORMAT

Each system is organized within the following format:

- It lists the references to be used for study and asks you to explain the function of each system.
- It asks for the static facts of what or where the components and component parts are in relation to the system.
- It directs attention to the dynamics of how the component and component parts operate to make the system function.
- It specifies the parameters that must be immediately recalled.
- It requires study of the relationship between the system being studied and other systems or areas.

200.4 HOW TO COMPLETE

The systems you must complete are listed in the Prerequisites section of each watchstation. When you have mastered one or more systems, contact your Qualifier. The Qualifier will give you an oral examination on each system and, if satisfied you have sufficient knowledge of the system, will sign the appropriate system line items. You will be expected to demonstrate through oral or written examination a thorough understanding of each system required for your watchstation.
201 BALLASTING SYSTEM

201.1 SYSTEM COMPONENTS AND COMPONENT PARTS

Referring to a standard print of this system or the actual equipment, identify the following system components and component parts and discuss the designated items for each:

A. What is its function?
B. Where is it located?
C. What are the sources of power?
D. What are the modes of operation or control?
E. What are the safety/protective devices for this component/component part?
F. What protection is provided by this component/component part?
G. What are the probable indications if this component fails?
H. What is the effect on system operation if this component fails?

Questions

201.1.1 Ballasting system [refs. a thru c]
.2 Floodable tanks and voids [refs. a thru c]
.3 Firemain fill valves, vent, blow, unloader and sea valves [refs. a thru c]
.4 Control stations [refs. a thru c]
.5 Clinometer [ref. b]

(A B C D E F G H)

(Signature and Date)

201.2 PRINCIPLES OF OPERATION

201.2.1 How do the components work together to achieve the system’s function? [refs. a thru c]

.2 Using a diagram of this system, show the path of: [refs. a thru c]

a. Seawater from the sea to the tank
b. Ballast from tank to tank
c. Deballast from the tank to the sea
201 BALLASTING SYSTEM (CONT’D)

201.2.3 What indications are received if the system is malfunctioning? [refs. a thru c]

(Signature and Date)

201.3 PARAMETERS/OPERATING LIMITS

For the items listed, answer the following questions: [refs. a, b]

A. What is the normal operating value?
B. What is the physical location of the indicators?

201.4 SYSTEM INTERFACE

201.4.1 How does this system interface with the following: [refs. a thru c]

a. Firemain
b. Fuel system
c. Electrical system
d. Main Drainage system
e. Secondary Drainage system

.2 How do the following outside influences affect the operation of this system: [refs. a thru c]

a. Loss of firemain
b. Loss of electric power
c. Loss of Deballasting Air system

(Signature and Date)

201.4 SAFETY PRECAUTIONS

201.4.1 What safety precautions must be observed when operating this system? [refs. a, c]

### Questions

#### 206.1.5 Freshwater hose reels [ref. b, sec. 3]
- a. Activation push button
- b. Holding tank
- c. Hose reel nozzle

#### 0.6 APC extinguishing system (range guard) [ref. a; ref. b, sec. 3]
- a. Remote manual control box
- b. Pressure release control box
- c. Fusible links
- d. APC cylinder
- e. Lever control head
- f. Pressure switches

#### 0.7 Steam smothering [ref. b, sec. 1]

#### 0.8 Water mist pumping station components [refs. a, c]
- a. Water mist supply tank
- b. Water mist pump
- c. Primary and secondary supply/isolation valves
- d. Simplex strainer
- e. Bulkhead isolation valves
- f. Primary and secondary high pressure water supply valves
- g. Water mist piping
- h. Nozzles

#### 0.9 Engine room Sprinkler system [refs. a, c]
- a. Remote manual control box

---

### Principles of Operation

205.2 Using a diagram of this system, show the path of the agent from the activation stations to the discharge nozzles: [ref. b, sec. 3]

- a. Fixed CO₂ systems
- b. HALON/HFP
- c. Saltwater
- d. Range guard (APC)
- e. Freshwater hose reel
- f. Watermist

210.1 SYSTEM COMPONENTS AND COMPONENT PARTS

Referring to a standard print of this system or the actual equipment, identify the following system components and component parts and discuss the designated items for each:

A. What is its function?
B. Where is it located?
C. What are the sources of power?
D. What protection is provided by this component/component part?
E. What are the probable indications if this component fails?
F. Where are the circuit breakers located?
G. What are the safety/protective devices for this component/component part?
H. What are the modes of operations or control?

Questions

210.1.1 Computer Based DC Management system [ref. a, sec. 39] A B C D E F G H

(Signature and Date)

210.2 PRINCIPLES OF OPERATION – None to be discussed.

210.3 PARAMETERS/OPERATING LIMITS – None to be discussed.

210.4 SYSTEM INTERFACE

210.4.1 How does the EMP/TREE affect the operation of this system? [ref. b, sec. 1.3]
210 COMPUTER BASED DAMAGE CONTROL (DC) MANAGEMENT SYSTEM (CONT’D)

210.4.2 How does this system interface with the following: [ref. a, sec. 39]

a. LAN databases
b. Alarm sensors
c. Communications
d. Remote monitoring stations

(Signature and Date)

211.2 PRINCIPLES OF OPERATION

211.2.1 How do the components work together to achieve the system’s function?  
   [ref. a, sec. 2]

   .2 Draw a diagram of your ship’s Firemain system. [refs. c, d]

(Signature and Date)

211.3 PARAMETERS/OPERATING LIMITS

For the items listed, answer the following questions:

A. What is the normal operating value?  
B. What are the allowable operating limits?  
C. What is/are the physical location(s) of the indicator(s)?  
D. What is the standard size?

(Signature and Date)

211.4 SYSTEM INTERFACE

211.4.1 How do the auxiliary systems effect the operation of this system? [ref. a, sec. 2]

(Signature and Date)

211.5 SAFETY PRECAUTIONS – None to be discussed.
300 INTRODUCTION TO WATCHSTATIONS

300.1 INTRODUCTION

The Watchstation section of your PQS is where you get a chance to demonstrate to your Qualifier that you can put the knowledge you have gained in the previous sections to use. It allows you to practice the tasks required for your watchstation and to handle abnormal conditions and emergencies. Before starting your assigned tasks, you must complete the prerequisites that pertain to the performance of that particular task. Satisfactory completion of all prerequisites is required prior to achievement of final watchstation qualification.

300.2 FORMAT

Each watchstation in this section contains:

- A FINAL QUALIFICATION PAGE, which is used to obtain the required signatures for approval and recording of Final Qualification.

- PREREQUISITES, which are items that must be certified completed before you can begin qualification for a particular watchstation. Prerequisites may include schools, watchstation qualifications from other PQS books, and fundamentals, systems, or watchstation qualifications from this book. Prior to signing off each prerequisite line item, the Qualifier must verify completion from existing records. Record the date of actual completion, not the sign-off date.

- WATCHSTATION Performance, which is the practical factors portion of your qualification. The performance is broken down as follows:
  
  Tasks (routine operating tasks that are performed frequently)
  Infrequent Tasks
  Abnormal Conditions
  Emergencies
  Training Watches

If there are multiple watchstations, a QUALIFICATION PROGRESS SUMMARY will appear at the end of the Standard.
300 INTRODUCTION TO WATCHSTATIONS (CONT’D)

300.3 OPERATING PROCEDURES

The PQS deliberately makes no attempt to specify the procedures to be used to
complete a task or control or correct a casualty. The only proper sources of this
information are the technical manuals, Engineering Operational Sequencing System
(EOSS), Naval Air Training and Operating Procedures Standardization (NATOPS)
or other policy-making documents prepared for a specific installation or a piece of
equipment. Additionally, the level of accuracy required of a trainee may vary from
school to school, ship to ship, and squadron to squadron based upon such factors
as mission requirements. Thus, proficiency may be confirmed only through
demonstrated performance at a level of competency sufficient to satisfy the
Commanding Officer.

300.4 DISCUSSION ITEMS

Though actual performance of evolutions is always preferable to observation or
discussion, some items listed in each watchstation may be too hazardous or time
consuming to perform or simulate. Therefore, you may be required to discuss such
items with your Qualifier.

300.5 NUMBERING

Each Final Qualification is assigned both a watchstation number and a NAVEDTRA
Final Qualification number. The NAVEDTRA number is to be used for recording
qualifications in service and training records.

300.6 HOW TO COMPLETE

After completing the required prerequisites applicable to a particular task, you may
perform the task under the supervision of a qualified watchstander. If you
satisfactorily perform the task and can explain each step, your Qualifier will sign you
off for that task. You may then be required to stand a watch or a number of watches
to earn qualification. There are two levels of supervision for this:

- Under Instruction: You will perform the duties and tasks of the watchstation
  under the direct supervision of a qualified watchstander or supervisor. This is
  intended to be a one-on-one training situation.
- Under qualified supervision: You will perform the duties and tasks of the
  watchstation with minor guidance from a qualified watchstander or supervisor.
  This is intended to allow you to develop proficiency in an operational
  environment with minimal oversight or have a supervisor close at hand if
  needed.

After all line items have been completed, your Qualifier will verify Final Qualification
by signing and dating the Final Qualification pages.
This page is to be used as a record of satisfactory completion of designated sections of the Personnel Qualification Standard (PQS). Only specified supervisors may signify completion of applicable sections either by written or oral examination, or by observation of performance. The examination or checkout need not cover every item; however, a sufficient number should be covered to demonstrate the examinee’s knowledge. Should supervisors give away their signatures, unnecessary difficulties can be expected in future routine operations.

A copy of this completed page shall be kept in the individual’s training jacket.

The trainee has completed all PQS requirements for this watchstation. Recommend designation as a qualified SOUNDING AND SECURITY (NAVEDTRA 43119-4H).

303.7  EXAMINATIONS (OPTIONAL EXCEPT AS REQUIRED BY TYCOM/ISIC, ETC.)

303.7.1  EXAMINATIONS  Pass a written examination

(Signature and Date)

.2  EXAMINATIONS  Pass an oral examination board

(Signature and Date)
This page is to be used as a record of satisfactory completion of designated sections of the Personnel Qualification Standard (PQS). Only specified supervisors may signify completion of applicable sections either by written or oral examination, or by observation of performance. The examination or checkout need not cover every item; however, a sufficient number should be covered to demonstrate the examinee’s knowledge. Should supervisors give away their signatures, unnecessary difficulties can be expected in future routine operations.

A copy of this completed page shall be kept in the individual’s training jacket.

The trainee has completed all PQS requirements for this watchstation. Recommend designation as a qualified FIRE MARSHALL (NAVEDTRA 43119-4H).

306.2 TASKS

For the tasks listed below:

A.  What are the steps of this procedure?
B.  What are the reasons for each step?
C.  What control/coordination is required?
D.  What means of communications are used?
E.  What safety precautions must be observed?
F.  What parameters/operating limits must be monitored?
G.  Satisfactorily perform this task.

306.2.1 Properly assume and relieve the watch IAW EDORM (2 times)

___________________________________
(Signature and Date)

___________________________________
(Signature and Date)
Maintain required logs and records IAW EDORM (2 times)

(Signature and Date)

(Signature and Date)

Direct the actions of supporting watches IAW EDORM (2 times)

(Signature and Date)

(Signature and Date)

Make reports as necessary to OOD/EOOW/EDO IAW EDORM (2 times)

(Signature and Date)

(Signature and Date)

Monitor all pressures, temperatures and levels on MCS console IAW EOSS (2 times)

(Signature and Date)

(Signature and Date)

Monitor and interpret alarm panels IAW EOSS (2 times)

(Signature and Date)

(Signature and Date)
Maintain fire main pressure while changing material condition or operating WDCM system IAW EOSS (2 times)  

(Signature and Date)  

(Signature and Date)  

Calculate draft reading IAW LOP (2 times)  

(Signature and Date)  

(Signature and Date)  

Demonstrate the ability to power up the DCCO console IAW EOSS  

(Signature and Date)  

Demonstrate the ability to power down the DCCO console IAW EOSS  

(Signature and Date)  

Navigate HMI screen IAW EOSS (2 times)  

(Signature and Date)  

(Signature and Date)
306  LHD 8/LHA 6 DAMAGE CONTROL CONSOLE OPERATOR (DCCO)  
(CONT’D)

306.2.12 Start, monitor, and secure fire pumps IAW EOSS (2 times)  

Questions  A B C D E F G

(Signature and Date)

(Signature and Date)

COMPLETED .2 AREAS COMPRISES 30% OF WATCHSTATION.

306.3 INFREQUENT TASKS – None to be discussed.

306.4 ABNORMAL CONDITIONS – None to be discussed.

306.5 EMERGENCIES

For the emergencies listed below:

A. What indications and alarms are received?
B. What immediate action is required?
C. What are the probable causes?
D. What operating limitations are imposed?
E. What other emergencies or malfunctions may occur if immediate action is not taken?
F. How does this emergency affect other operations/equipment/watchstations?
G. What follow-up action is required?
H. Satisfactorily perform or simulate the immediate action for this emergency.

Questions  A B C D E F G H

306.5.1 Abnormal sounding IAW LOP (2 times)  

(306.5.1)  

(Signature and Date)

(Signature and Date)

.2 Abnormal list or trim IAW LOP (2 times)  

A B C D E F G H

(Signature and Date)

(Signature and Date)
306.5.3 Abnormal draft IAW LOP (2 times)

(Signature and Date)

(Signature and Date)

.4 Violations of material conditions of readiness IAW LOP (2 times)

(Signature and Date)

(Signature and Date)

.5 Class B fire IAW LOP (2 times)

(Signature and Date)

(Signature and Date)

.6 Class C fire IAW LOP (2 times)

(Signature and Date)

(Signature and Date)

.7 Class A fire IAW LOP (2 times)

(Signature and Date)

(Signature and Date)

.8 HAZMAT spill IAW LOP (2 times)

(Signature and Date)
LHD 8/LHA 6 DAMAGE CONTROL CONSOLE OPERATOR (DCCO) (CONT’D)

306.5.8

(Signature and Date)

.9  Toxic spill IAW LOP (2 times)  A B C D E F G H
(Signature and Date)
(Signature and Date)

.10  Personnel injury IAW LOP (2 times)  A B C D E F G H
(Signature and Date)
(Signature and Date)
(Signature and Date)

.11  Loss of fire main pressure IAW LOP (2 times)  A B C D E F G H
(Signature and Date)
(Signature and Date)

.12  Loss of electrical power IAW LOP (2 times)  A B C D E F G H
(Signature and Date)
(Signature and Date)

.13  Loss of communications IAW LOP (2 times)  A B C D E F G H
(Signature and Date)
(Signature and Date)
306.5.14 Loss of CPS zones IAW LOP (2 times)  

(Signature and Date)  

(Signature and Date)  

.15 Flooding IAW LOP (2 times)  

(Signature and Date)  

(Signature and Date)  

.16 Ruptured fire main piping IAW LOP (2 times)  

(Signature and Date)  

(Signature and Date)  

.17 Loss of MCS IAW EOCC (2 times)  

(Signature and Date)  

(Signature and Date)  

.18 Class C fire in MCS console IAW EOCC (2 times)  

(Signature and Date)  

(Signature and Date)  

COMPLETED .5 AREA COMPRISSES 30% OF WATCHSTATION.
306 LHD 8/LHA 6 DAMAGE CONTROL CONSOLE OPERATOR (DCCO) (CONT’D)

306.6 WATCHES

306.6.1 STAND THE FOLLOWING WATCHES UNDER QUALIFIED SUPERVISION:

LHD 8/LHA 6 Damage Control Console Operator (DCCO) (3 times)

(Signature and Date)

(Signature and Date)

(Signature and Date)

COMPLETED .6 AREA COMPRISES 15% OF WATCHSTATION.

306.7 EXAMINATIONS (OPTIONAL EXCEPT AS REQUIRED BY TYCOM/ISIC, ETC.)

306.7.1 EXAMINATIONS Pass a written examination

(Signature and Date)

.2 EXAMINATIONS Pass an oral examination board

(Signature and Date)
This qualification progress summary is used to track the progress of a trainee in the watchstations for this PQS and ensure awareness of remaining tasks. It should be kept by the individual or in the individual's training jacket and updated with an appropriate signature (Training Petty Officer, Division Officer, Senior Watch Officer, etc.) as watchstations are completed.
